

Supporting Numeracy for Aspiring Professionals

Transforming numeracy in your chosen field from fear to friend

Careers teachers may find post 14 or 16 learners can often be deterred from pursuing a professional programme of study in nursing, medicine and pharmacy due to the numeracy requirements of the courses. SN@P Assessment & Education is an online resource specialising in numerical education and assessment that is designed to support learners when making crucial career-related decisions.

SN@P offers an 'anytime, anyplace' resource for aspiring professionals to overcome their numerical fears by providing a full package of support established from our long-standing partnerships with UK-wide further and higher education healthcare programmes.

Putting Numeracy into Context

Once registered, all learners and supporting teachers will have access to a range of contextualised assessments, interactive eLearning short courses, progression reports and expert subject tutorials. The system is tailored to the level and context of real-world numeracy and calculation skills required for healthcare programmes such as nursing, midwifery, medicine and pharmacy.

At SN@P, we aim to build insight and confidence for learners considering a healthcare career. We also provide assurances for academic staff that their students are fully prepared for pre-course interviews and also gain an insight into higher education study.
